PROFESSIONAL EXPERIENCE

Full Stack Engineer | Resilient Coders | Remote | 2026 - Present

- Build and deploy full-stack JavaScript applications with Node.js, Express, and MongoDB, taking each project from database schema to a hosted, documented production site.
- Built Workout Log, a training app with Passport authentication and a Mongoose model that enforces real validation rules (category enums, numeric ranges, required fields), owner-only editing and deleting, and per-user training stats computed from the data.
- Built Private Notes, a journaling app with login and mood tracking where privacy is enforced in the database queries themselves, so a user only ever sees their own notes. Live on Render.
- Built Halal Eats, a full CRUD app (Express, MongoDB, EJS) for tracking halal restaurants, with hand-written responsive CSS at phone, tablet, and desktop breakpoints. Live on Render.
- Developing Hoops, a court-finding app that maps 558 NYC basketball courts and shows anonymous park traffic, designed so no individual player is ever tracked.
- Document every project with a README, screenshots, and live links, and maintain a daily JavaScript problem-solving streak on Codewars.

Full Stack Engineer | Freelance | Long Island, NY | 2026 - Present

- Designed and built a digital storefront for SunnahWay, a modest-fashion retailer: custom theme styling, collection pages for Men, Women, Kids, and Fragrances, a 20+ product catalog, and a customer reviews system.
- Built and launched a portfolio website for a client, live at andrewmakrides.com, from layout and styling to deployment.
- Prospect local small businesses with weak or missing websites and pitch web work leading with a free homepage mockup.

ADDITIONAL EXPERIENCE

Delivery Driver | Rinse | Brooklyn, NY | 2024 - 2025

- Ran daily delivery routes across Brooklyn on tight pickup and drop-off schedules, coordinating with dispatch and customers.

Electrical Assistant | Independent | NYC and Long Island | 2018 - 2025

- Assisted electricians on residential and commercial projects across NYC and Long Island over seven years.

Solar Sales Representative | Hytech | Queens, NY | Summer 2024

- Presented residential solar options to homeowners and set consultation appointments.
